

To customize anything from the WINDOWS SETTINGS, Do these two things at first :

1. Most Important Pre-work before customizing (If you know you know)
2. Then Create a Local Account If you don't have it yet.

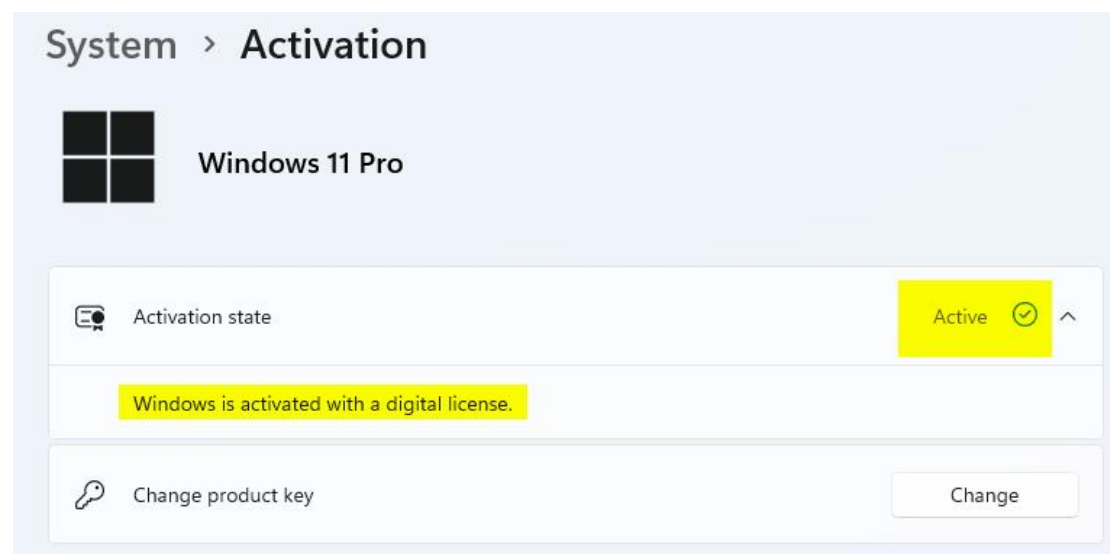

MOST IMPORTANT WORK (Before Beginning)

Goal : Activating Windows11

Steps:

1. Make sure that, You have a stable Internet.
2. press **WIN** key
3. type "**Powershell**" and hit **enter** (Go to Windows Powershell)
4. **paste** this text : `irm https://get.activated.win | iex`
5. hit **ok**
6. In another pop up : **press 1**
7. In another pop up : **press 1**
8. Press anywhere to go back (press **spacebar**)
9. **Close** everything (*Optional : You can restart your computer*)
10. **✓ Done** (*Activated*)

Now you can Customize your Environment.

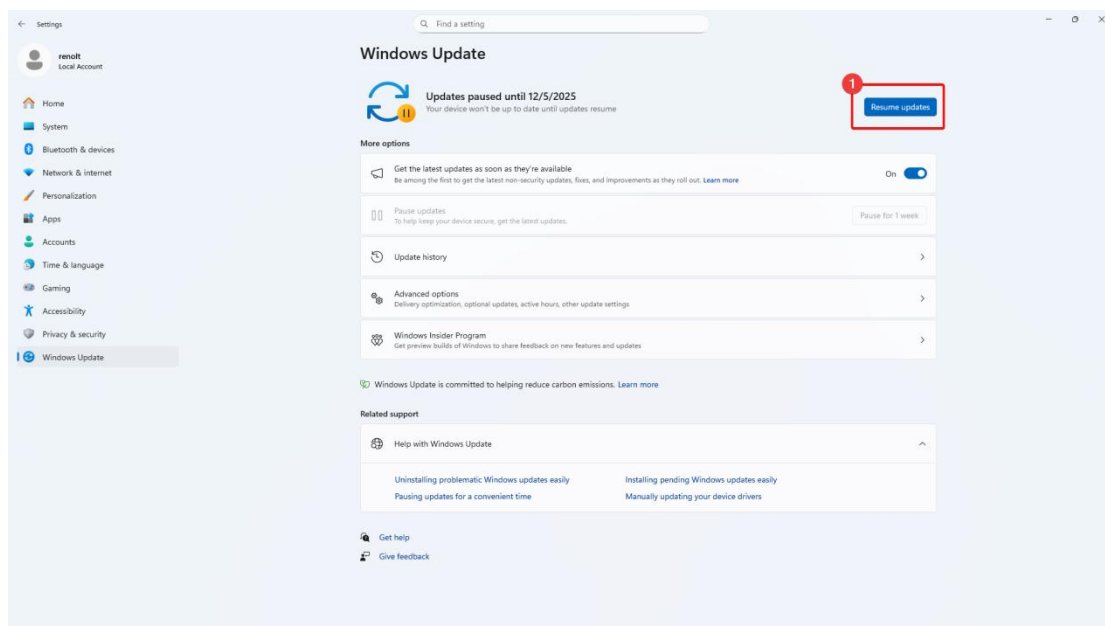

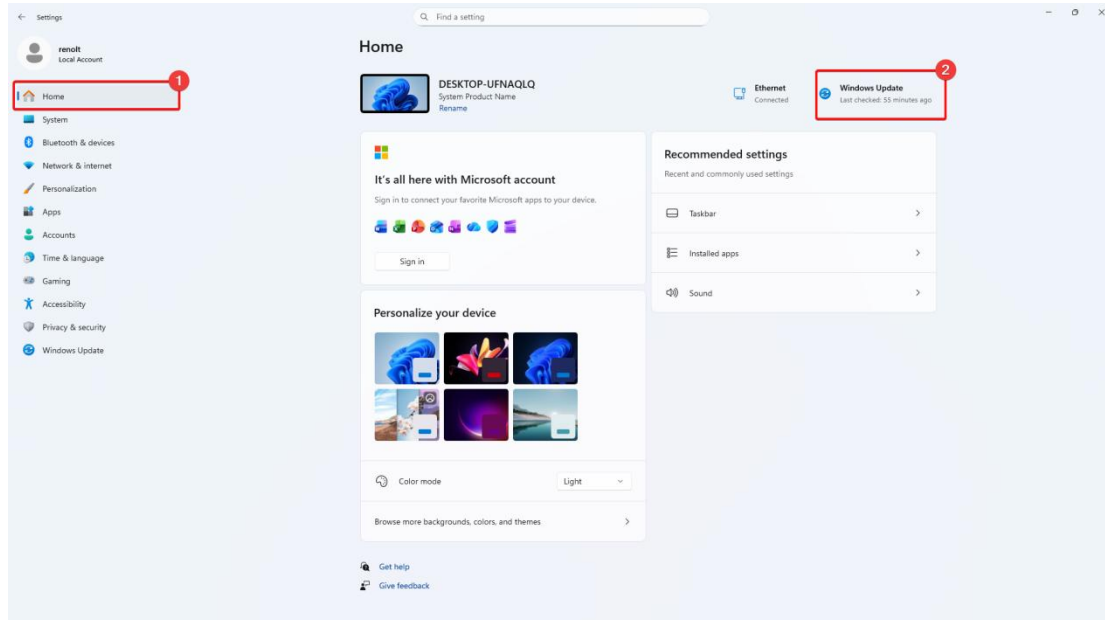

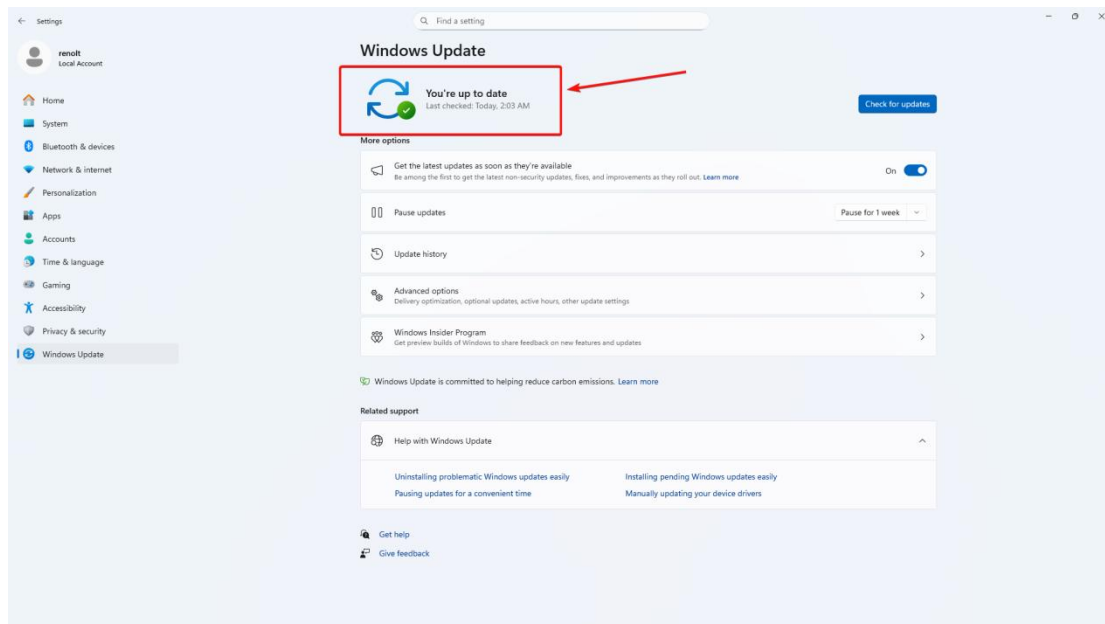

Creating a Local Account (If you don't have it yet)

N:B: Mandatory to do this thing, Remove your MS_account from the Computer and after all these you have done the Important job and also you have a Fully Local account (What you can Customize)

Press WIN + I --> to go to Settings (in windows OS)

I have only marked the things that I change here, the rest of the things are always come in default settings.

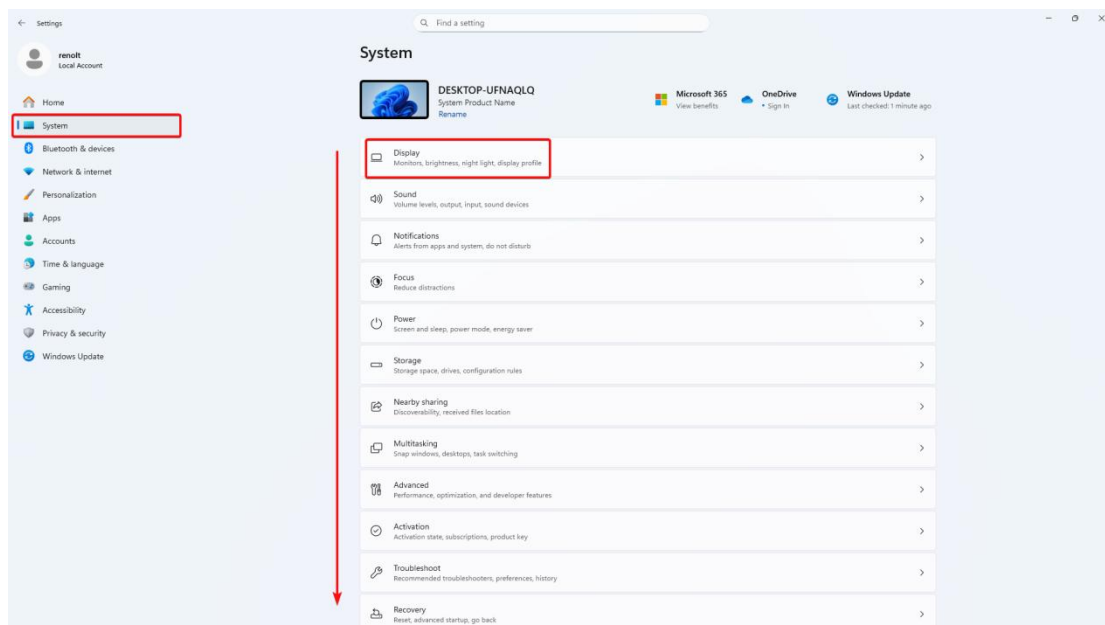

After the latest Version
Now If you want you can Pasue the Updates

NOTIFICATIONS

System > Notifications

The screenshot shows the Windows Settings application, specifically the 'System' > 'Notifications' section. The page is divided into several sections. The first section, 'Notifications', has a toggle switch labeled 'On' (1) and a list of four checkboxes (2) for notification settings. The second section, 'Do not disturb', has a toggle switch labeled 'On' (3). The third section, 'Turn on do not disturb automatically', includes a list of checkboxes for automatic settings (4) and a table for scheduling. The fourth section, 'Set priority notifications', has a right arrow. The fifth section, 'Focus', also has a right arrow.

1 Notifications toggle switch (On)

2 Notification checkboxes:

- ☐ Allow notifications to play sounds
- ☐ Show notifications on the lock screen
- ☐ Show reminders and incoming VoIP calls on the lock screen
- ☐ Show notification bell icon

3 Do not disturb toggle switch (On)

4 Automatic do not disturb checkboxes:

- ☒ During these times
- ☒ When duplicating your display (priority notification banners are also hidden)
- ☒ When playing a game
- ☒ When using an app in full-screen mode (priority notification banners are also hidden)
- ☒ For the first hour after a Windows feature update

Automatic Scheduling:

Turn on	Turn off	Repeat
11:00 PM	7:00 AM	Daily

Set priority notifications >

Focus >
Session duration, hide badges on apps

For all these I will go through one by one and do the same thing for image-00.

PRIVACY & SECURITY

WINDOWS SECURITY

This is my personal Preferences you should not do this unless you know what you are doing.

Virus & threat protection settings

View and update Virus & threat protection settings for Microsoft Defender Antivirus.

Real-time protection

Locates and stops malware from installing or running on your device. You can turn off this setting for a short time before it turns back on automatically.

Real-time protection is off, leaving your device vulnerable.

Off

Turn on real-time protection to use this feature.

Dev Drive protection

Scans for threats asynchronously on Dev Drive volumes to reduce performance impact.

Off

[See volumes](#)

[Learn more](#)

Cloud-delivered protection

Provides increased and faster protection with access to the latest protection data in the cloud. Works best with Automatic sample submission turned on.

Off

Automatic sample submission

Send sample files to Microsoft to help protect you and others from potential threats. We'll prompt you if the file we need is likely to contain personal information.

☐ Off

[Submit a sample manually](#)

Tamper Protection

Prevents others from tampering with important security features.

⚠ Tamper protection is off. Your device may be vulnerable. [Dismiss](#)

☐ Off

[Learn more](#)

Controlled folder access requires turning on Real-time protection.

Controlled folder access

Protect files, folders, and memory areas on your device from unauthorized changes by unfriendly applications.

[Manage Controlled folder access](#)

Exclusions

Microsoft Defender Antivirus won't scan items that have been excluded. Excluded items could contain threats that make your device vulnerable.

[Add or remove exclusions](#)
